## ELECTRIFIED SECURITY SOLUTIONS

Improving safety, security and transparency.

S.A. Morman's electrified security solutions provide an end-to-end solution that will improve safety, security, and transparency throughout your space:

- Access Control Systems
- Video Management Systems
- Electrified Hardware

### ACCESS CONTROL SYSTEMS

S.A. Morman is **equipped to supply and install system control panels and software** used to control access rights in a given space. Access can be controlled through scheduled opening times, card access, keyless entry and biometric scanning capabilities. The level of security and permissions are customizable and our staff will work with you to achieve the desired level of control.

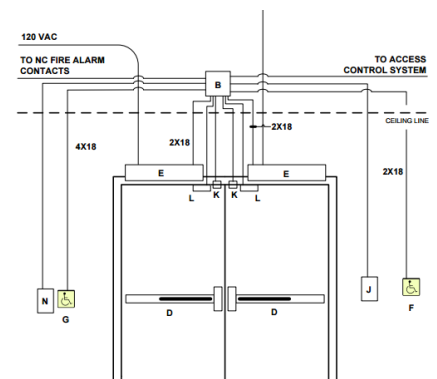

### VIDEO MANAGEMENT SYSTEMS

The S.A. Morman **video management offering includes a range of streaming options, cameras and levels of security**. Video management can be added to any space to increase security and transparency. We provide video management software that can be accessed as a standalone system or fully integrate into your access control software.

### ELECTRIFIED HARDWARE

Electrified hardware serves as **the foundation of an access control system**. S.A. Morman **experts will work with you to determine needs and will select electrified hardware** components to achieve the desired functionality. Our electrified hardware products include, but are not limited to, electric strikes, magnetic locks, electrified exit devices, keypads, wireless locks, fully integrated locks, door contacts and power supplies.
